PERSONAL SKILLS/OTHER SKILLS

Able to face problems in an optimistic approach, in a top-down fashion and with the willing to do my best thanks to the dedication that I have implemented over the years of engineering studies. I'm able to work independently and also in team, thanks to many projects carried out during the study course, to the experience gained in a students team and to the group spirit acquired during the years in a basketball team playing in a championship. I had experiences in communicating results of my works to clients or in classroom in front of other colleagues thanks to professional experiences and the abroad studies. I enjoy taking part in decisional processes of a team and eventually guide them in my decisions.
